

What you cannot bring into your hospital room

We are committed to providing a safe and comfortable environment for all patients. Sunnybrook Health Sciences Centre policy (PC-0054) outlines that some electrical items are not allowed in your hospital room.

We kindly ask that you **DO NOT** bring these items into your hospital room:

Fan

Kettle

Hair dryer

Humidifier

Small cooking appliances like microwave ovens, toasters, rice cookers and coffee makers

Thank you for your help and understanding in keeping the hospital room a safe and comfortable environment for all.

If you have any questions about what you can bring into your hospital room, please ask your health care team.
