

ODETTE CANCER CENTRE

Cancer affects **everyone** in different ways and each of us has our own needs.

In our cancer programs at Sunnybrook Health Sciences Centre, we recognize our **LGBTQ2S+** patients have their own needs.

We welcome you and want you to **feel comfortable** sharing your needs with us.

Many LGBTQ2S+ people with cancer will not identify themselves to their healthcare team.

You may not feel comfortable in the healthcare system.

This is often because of negative experiences you may have had when you have used healthcare services.

Person-Centered Care is about focusing on those parts of your care that **matter most** to you.

We want to know what we can do to make your care experience **better.**

If you want to talk to someone about what matters to you, ask your healthcare team. Our staff is trained in diversity and equity.
