What you need to know for your visits.

If you or a family member feel more comfortable speaking in a language other than English you may need a professional interpreter.

Interpreters can improve your communication with your healthcare provider by allowing both parties to speak easily in their own language.

Using interpretation services at your medical appointment will not affect your personal privacy and confidentiality. We have taken steps to ensure that everyone who performs services for us protects your privacy and only uses your personal health information for the purposes you have consented to.

Please let your health care team know at least 3 business days in advance of your appointment if you need interpretation services or visit [sunnybrook.ca/interpreters](https://www.sunnybrook.ca/interpreters) to fill in the online form.

Visit [sunnybrook.ca/cancereducation](https://www.sunnybrook.ca/cancereducation) to find information about cancer, treatment, side effects, supports and more. If you have any questions or cannot find the information you are looking for, please email us at patienteducation@sunnybrook.ca.
