

Sunnybrook Nuclear Testing Business As Usual

December 7, 2007

Sunnybrook Health Sciences Centre would like to inform its patients that medical imaging tests for all patients are being performed on their regular course and there are no delays in scheduled scans or tests.

"We want to assure our patients that they can expect to receive their scheduled tests at Sunnybrook in light of recent cancellations by other healthcare facilities across the country," says Dr. Linda Rabeneck, head of the Odette Cancer Centre at Sunnybrook Health Sciences Centre.

"Sunnybrook is not affected by the shutdown of reactor supplies being experienced by many other healthcare facilities across the country as Sunnybrook uses a different supplier," says Asha Ahmed, charge technologist in Nuclear Medicine at Sunnybrook.

Sunnybrook Health Sciences Centre is transforming health care through the dedication of its more than 10,000 staff, physicians and volunteers who provide compassionate and innovative patient focused care. An internationally recognized leader in academic research and education and an affiliation with the University of Toronto distinguishes Sunnybrook as one of Canada's premier health sciences centres. Sunnybrook specializes in caring for newborns, adults and the elderly, treating and preventing cancer, neurological and psychiatric disorders, cardiovascular disease, orthopaedic and arthritic conditions and traumatic injuries.
